KANNA NANI

Python Full Stack Developer | Data Analyst

+91 8639638185 | Andhra Pradesh, India | kannanani@gmail.com

GitHub | LinkedIn

Professional Summary

Computer Science and Engineering graduate with skills in Python programming, full-stack web development, data analysis, and machine learning. Familiar with Django, Flask, SQL, Pandas, NumPy, Scikit-learn, TensorFlow/Keras, OpenCV, and Power BI. Developing an AI Smart Agriculture Platform focused on crop health analysis, fertilizer recommendations, weather insights, and crop yield prediction.

Skills

Programming Languages: Python, SQL, JavaScript, HTML5, CSS3
Frameworks & Libraries: Django, Bootstrap, React.js, Pandas, NumPy,
Data & Visualization: Matplotlib,Power BI, Excel,
Database & Tools: MySQL, Git, GitHub, VS Code,
Soft Skills: Communication, Problem Solving, Teamwork, Adaptability

Education

B.Tech in Computer Science & Engineering — **Oct 2022 – May 2026**
Dhanalakshmi Srinivasan University, Tamil Nadu — **66%**

Intermediate (MPC) — **Jul 2020 – Mar 2022**
Sri Chaitanya Junior College, Ongole — **63%**

SSC — **Jun 2019 – Mar 2020**
Sri Ganga High School, East Gangavaram — **75%**

Experience

Python Programming Intern — **Jul 2025 – Sep 2025**
Codex Techno

- Completed a Python Programming internship focused on core programming concepts and practical development.
- Practiced Python variables, loops, functions, object-oriented programming, and file handling.
- Applied debugging techniques and developed programming assignments using Python.
- Worked on practical Python coding tasks to strengthen problem-solving and logical thinking skills.
- Gained hands-on experience in writing, testing, and maintaining clean, reusable Python code.

Projects

AI Smart Agriculture Platform — **Aug 2026**
-Python, Django/Flask, HTML5, CSS3, JavaScript, Bootstrap, NumPy, Pandas, Scikit-learn, TensorFlow/Keras, OpenCV, CNN, MySQL

- Developing an AI-powered agriculture platform using machine learning, computer vision, and agricultural data to support farming decisions.
- Building image-based crop disease analysis using OpenCV, Convolutional Neural Networks (CNN), and TensorFlow/Keras.
- Planning features for fertilizer recommendations, weather insights, agricultural data processing, and expected crop yield prediction.

IPL Match & Player Performance Analysis — **Oct 2025**
-Python, Pandas, NumPy, Matplotlib, Seaborn, Power BI

- Analyzed IPL match and ball-by-ball datasets using Python and Pandas to explore player and team performance.
- Performed data cleaning, preprocessing, and exploratory data analysis to identify player, team, venue, and season trends.
- Created Power BI dashboards to present team wins, player statistics, venue performance, and season-wise trends.
- Identified key performance insights and trends using data visualizations to support data-driven comparisons across teams, players, and seasons.

Certifications

Foundations of Python — Google Career Certifications (Cursa)
Machine Learning & Python — Udemy
Data Analytics Foundations — Infosys Springboard
